

## **PIP Healthcare Cleaning at the Midland Medical Clinic**

**Location:** Fort Lauderdale, Florida, USA

**Date:** January 2008.

**Products used:** PIP Healthcare Cleaners and PIP Allergy Free.

**Co-ordinator:** Midland Medical Clinic

### **Goal of the test**

To evaluate the new probiotic approach of PIP Healthcare Cleaning products to reduce the risk of transmitting infections from the surfaces within the Clinic to the patients.

### **Results**

In early 2008 the Midland Medical Clinic started their PIP Healthcare testing by cleaning one of their exam rooms exclusively with PIP Healthcare cleaners, and comparing the results with the other exam rooms. This first test was projected to last for 30 days, however, after the first week of bacteriological sampling, the unexpected degree of success was so impressive that they expanded the testing to additional exam rooms, patient waiting rooms, and other areas.

Every test of PIP Healthcare cleaning (quantified by using 3M test kits) replicated the same positive results. In every case, the test cultures of all cleaned areas quickly showed vastly reduced risk of pathogens. It was also noted that the effects of PIP Healthcare cleaning lasted for 3 days after each application, and that it provided a much cleaner and brighter look.

In the final analysis, the staff was pleasantly surprised to find that PIP Healthcare cleaning had reduced the risk of harmful bacteria by at least 95% when compared to normal disinfecting and cleaning products.

Chrisal's PIP Allergy Free Spray was also proven to be a very important aid to the patients because it provided a significant reduction in risk of allergic reactions, resting their immune systems, and allowing them to recover more quickly.

### **Conclusion**

**The PIP Healthcare Cleaning products have been used at the Midland Medical Clinic for more than 3 years, and the Clinic now fully endorses the use of PIP Healthcare products. It has proven to be a complete environmental cleaning system, from the microscopic to the visual level.**
